The CEO Sensorium — intelligence layer - real-time command center for Fortune-2000 leaders.

What a CEO needs to know and action,
before the business is impacted.

data · relevance · interpretation

Overwhelmed AND under-informed at the same time.

The 10,000-person CEO has never had more tools — and less visibility.

OVERWHELMED

UNDER-INFORMED

Strategic Blindness
(Analyst - Manager - Director - VP - CEO)

CHAOS & NOISE

Crisis Blindness
(small problems butterfly-effect into chaos)

Too many tools. Too many reports. Too many dashboards.

Enterprise companies are not agile - information flows very slowly.

The CEO Sensorium — intelligence layer — real-time command center

Faster than the **CoS chain** · wider than the **skip-level network** · across **strategic + crisis** horizons, full **S1–S5** concern space.
